

## Map Symbol Bingo

On the bottom of each card, there is a card number ranging from 1 to 45 and a group letter ranging from A to F. There are either 7 or 8 cards in each group and only 15 map symbols which relate to each group.

You can play two versions of this game. A long version which uses all 45 cards and all 90 map symbols or a shorter version allowing the caller to remove the map symbols which are not in play.

For example Group A contains the following cards 1, 7, 13, 19, 25, 31, 37 and 43. The map symbols which only appear in this group are 6, 12, 18, 24, 30, 36, 42, 48, 54, 60, 66, 72, 78, 84, and 90 hence reducing the play time.

Equally you could issue every scout within your troop a card for example 31 scouts, playing with the cards in Groups A to D. This would save you time as you would not have to call the map symbols relating to Groups E and F an additional 30 map symbol calls.
